

В прошедшие выходные принял участие в очередном FT8 RoundUP.

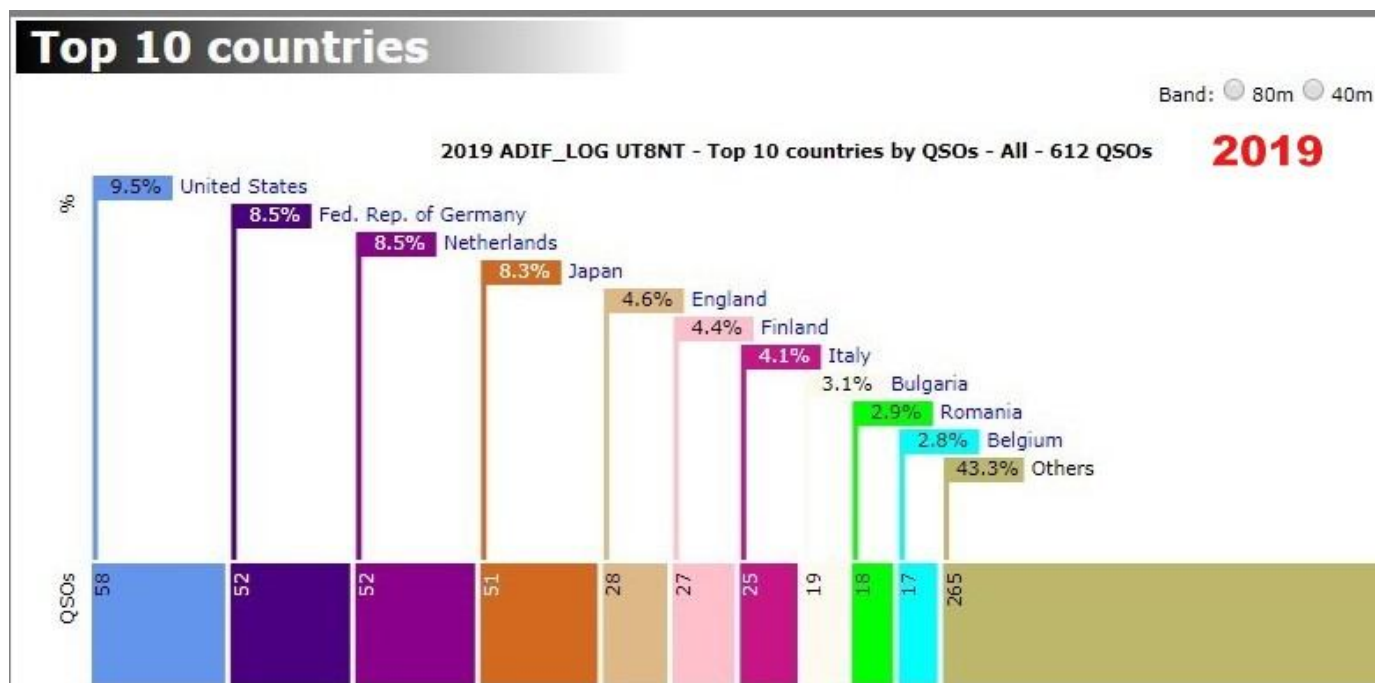

Ожидал от теста большего. Иногда в повседневной работе география стран намного шире чем в рамках контеста. Всего 56 стран. Возможно проход, возможно слабая реклама организаторов, возможно FT8 только входит в контестинг. Еще дата контеста совпала с несколькими популярными тестами, которые очевидно «оттянули» часть участников на себя. Я отработал 24 часа из 36. Провел 610 QSO. Работал двумя модами FT4 и FT8. Только два раза получил контрольный номер больше чем у меня. Это вселяет надежды на хороший общий результат. Много станций в конце теста давали порядковые номера которые говорили о только что начатой работе. Статистику по тесту я приведу в сравнении с прошлогодним FT8 RoundUP, так будет нагляднее, по каким пунктам результат выше, по каким ниже.

Общее количество по диапазонам
